

ROAM Enhancements

This document outlines ROAM enhancements effective August 2014.

Redesigned User Interface

The redesigned user interface enhancements include style changes to the logo, headers, buttons, grids, and improvements to system navigation.

New Logo

The new logo was designed to symbolize our singular focus on you and our commitment to improve global communications and consistency in messaging.

Updated Headers

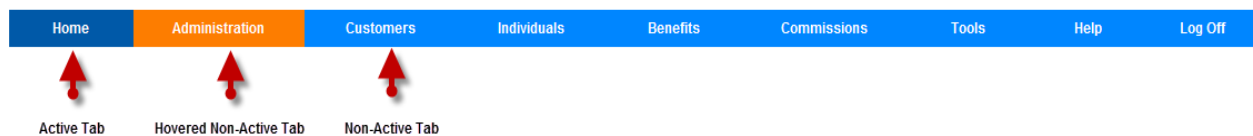

The color scheme for all page headers, containing the new ROAM logo and corporate logo, are now displayed in a white backdrop.

Redesigned Button and Tab Controls

The following changes are available to improve button and tab controls:

- The redesigned page buttons are now displayed in white text with an orange background. When hovered, these controls are displayed in white text with a bright blue background.
- In the active state, the tab controls in the Menu Bar are displayed in white text with a dark blue background.
- In the non-active state, the tab controls are displayed in white text with a bright blue background. When hovered, these controls are displayed in white text with an orange background.

The following changes are available to improve system navigation:
