

The Center for the Built Environment (CBE) at UC Berkeley is looking for a researcher to join our team and manage the CBE Occupant Survey Project, studying occupant response to indoor environmental quality. This flagship program offers a lot of opportunity for creative input. You can learn more about the web-based Survey Project at: <http://www.cbe.berkeley.edu/research/survey.htm>

Responsibilities would include: overall project management, interacting with various organizations and building owners, carrying out post-occupancy evaluations and building benchmarking projects, ongoing technical development of the survey and reporting tool, analyzing the data to improve our understanding of the relationships between building characteristics and occupant satisfaction, writing proposals and reports, and various outreach efforts through both presentations and publications.

In brief, qualifications include (but are not limited to): academic degree in related field, experience with building-related research and post-occupancy evaluation of building performance, knowledge of commercial building design and/or operation, some experience with statistical analysis, and excellent organization and communication skills.

For more details about the position, qualifications, salary, and how to apply, please see our website: <http://www.cbe.berkeley.edu/jobs/>
