

LEED

Build green. Everyone profits.

Incorporating LEED into Project Specifications Wednesday, March 16th, 2005 • 8:30am-12:30pm

Douglas Hall
Center for Urban Horticulture, University of Washington
3501 NE 41st St.
Seattle, WA 98105

LEED

The LEED Green Building Rating System is a comprehensive, voluntary design and assessment tool that helps architecture, engineering and construction professionals improve building efficiency, and measure the sustainability of their projects. Understanding LEED is an important step for reducing environmental impacts and achieving superior economic performance. **Architects, engineers, facility managers and building owners** who master LEED concepts and processes become knowledgeable practitioners and consumers of green design and construction.

Incorporating LEED into Project Specifications

This half-day session will review the basic principles of specifications as they apply to green building. Project team members will be provided with strategies to develop construction specifications appropriate to project goals and tips for achieving LEED compliance.

Onsite registration begins at 8:00am; the workshop will take place from 8:30am – 12:30pm.

REGISTRATION

Please visit our website: www.usgbc.org. Registration will open for this module on Wednesday, February 16th. There are no prerequisites for this course. Anyone in the building industry is invited to attend. **Please note that late registration rates take effect on Wednesday, March 9th.**
