VEL Engineering, one of B.C.'s leading mechanical engineering firms and a pioneer in innovative design, is seeking accomplished Professional Engineers for the position of Project Manager for our Vancouver and Toronto offices.

PROJECT MANAGER

Mechanical Consulting Engineer

Candidates must have 5-10 years specific experience working directly with HVAC, plumbing and fire protection design in a variety of building systems. The successful candidate must be a self-motivated leader with: superior technical skills in all areas of HVAC design, excellent interpersonal skills with clients, staff, and other disciplines and strong project management abilities. A passion for the integrated design process, sustainable and passive design concepts, microclimate analysis and advanced building modeling tools are required. LEED accreditation is an asset. The right candidate for this position is a creative, open-minded person who looks outside the box for design solutions while keeping one foot firmly planted in the practicalities of building design and project management. Competitive salaries, benefits, profit sharing and future ownership potential apply to this position. If you are interested in this opportunity, please email jmckay@veleng.com, or fax a cover letter and resume as stated above. Qualified candidates will be contacted for interviews.
