## HIGH PERFORMANCE SCHOOLS WORKSHOP

*WELL-DESIGNED SCHOOLS IMPROVE STUDENT PERFORMANCE WHILE CUTTING ENERGY COSTS*

AIA Portland and BetterBricks are pleased to offer a High Performance Schools workshop presented by G.Z. Brown of the Energy Studies in Building Laboratory at the University of Oregon and Mark Frankel of Paladino and Company.

This half-day workshop will focus on effective strategies for designing a high performance school. Featured will be a discussion of the integrated design process and key design features that optimize comfort, indoor air quality, and lighting while reducing energy consumption. Covered will be the tools, analysis and criteria needed to identify the best energy-savings opportunities as well as implementation strategies. Lessons learned from a prototype high performance classroom and recent local projects will be presented.

### **PRESENTERS:**

G.Z. Brown is a Professor of Architecture and Director and the Energy Studies in Building Laboratory. Brown has been a faculty member of the UO since 1977 and has conducted workshops and consulted widely.

Mr. Frankel is a registered architect, LEED™ Accredited Professional and a BetterBricks Advisor. As a senior consultant at Paladino and Company, Frankel consults on sustainable design projects all over the country. Mark Frankel also develops and presents trainings for BetterBricks.
